PRESS RELEASE

SecureTech Launches Top Kontrol Technician Training Program Now Accepting Applications for This Month's Classes (September 24 – 29)

Roseville, Minnesota – September 16, 2020 – SecureTech Innovations, Inc., an emerging growth company focused on developing and marketing personal and automobile security and safety devices and technologies, announces that it has successfully launched its previously disclosed Top Kontrol Technician Training Program with an emphasis on participants' safety during the ongoing COVID-19 pandemic.

Over this past weekend, SecureTech successfully held two trial classes certifying new automobile technicians on proper installation and maintenance of Top Kontrol in various types of vehicles. These classes were held outside in a large open area to minimize the risk of potential exposure to COVID-19 compared to the narrow confines of a typical vehicle servicing bay. Through these trial classes, SecureTech trained and certified 14 new Certified Top Kontrol Technicians.

SecureTech will be hosting additional training classes later this month from September 24th through 29th. Anyone interested in applying for any of these classes to become a Certified Top Kontrol Technician needs to contact Human Resources at hr@securetechinnovations.com and reserve a position today.

Kao Lee, SecureTech's President and CEO, stated, "We are very excited to be holding training classes for groups of automobile technicians. The COVID-19 pandemic has forced us to think outside of the box on how to safely get groups of people together to certify them on the proper ways to install and maintain Top Kontrol units in various vehicles. Our success over the past weekend has demonstrated that training can move forward safely and that no pandemic can stop our candidates from becoming Certified Top Kontrol Technicians."

"Holding training classes and being able to certify new technicians is a critical element to the growth of our company. Due to its complexity, a Certified Top Kontrol Technician must install Top Kontrol. Up until now, we've only had a handful of certified technicians, which has limited sales potential. These training programs will certify larger numbers of technicians at a time, which will help alleviate this installation bottleneck, and open the door to allowing us to expand our sales efforts," added Mr. Lee.

About SecureTech Innovations

SecureTech is an emerging growth company focused on developing and marketing personal and automobile security and safety devices and technologies – our products preserve life, protect property, and prevent crime. SecureTech is the maker of [Top Kontrol®](#), the only anti-theft and anti-carjacking system known that can safely stop a carjacking without any action by the driver.
